

Dear Customer,

It's hot in Lugano, and so is the news we wish to share: We have implemented some great new platform features:

Caveau habla español!

First of all, a good news for our Spanish speaking friends: Caveau finally speaks your language! "Perdon por el retraso!"

Improved Search

Our search functionality now gives you the ability to filter your queries by Timeframe and Type of resource searched. It allows you to scroll a long list of results, to return back to the search results after opening the single documents, or to multi-select items to download or delete them.

New Color Schemes

Branding is important to you, and we would like our platform to feel like your own. Historically, we provided the ability to replace the standard logo with Your own Brand. We've extended branding capability to now allow you to change the color scheme of the entire user interface in order to match your corporate identity or simply to appeal to your liking.

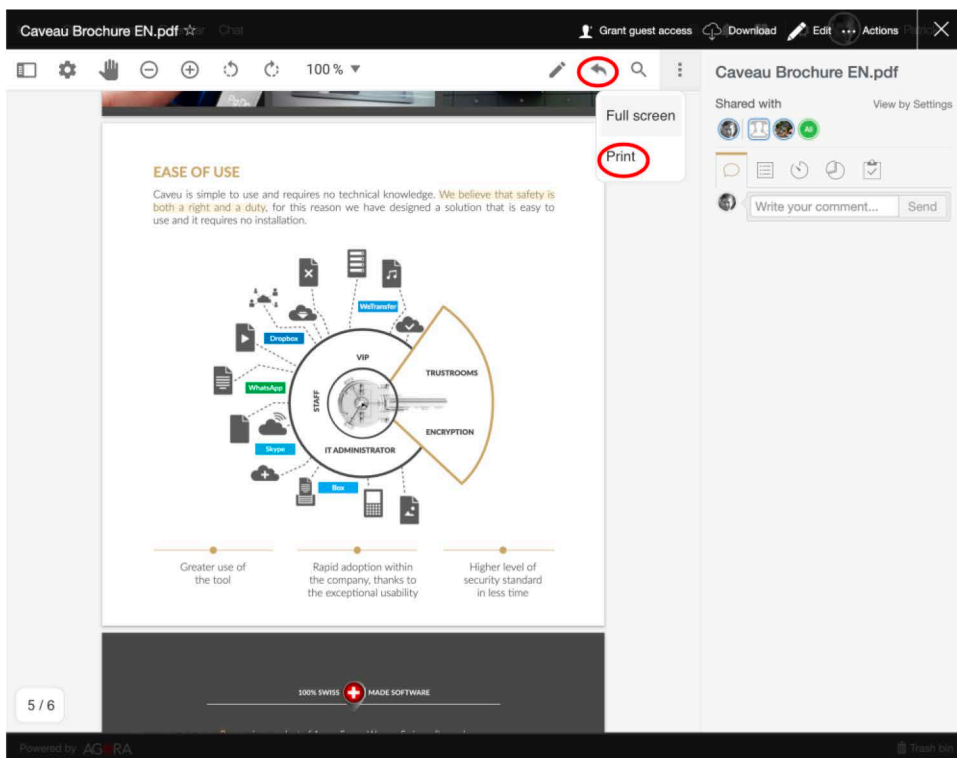

To change it, go under "Community settings" click on "Edit" and under "Theme and options" you will find different color schemes to choose from.

Can't you find a matching color scheme? Please contact us!
 As this functionality is evolving, we'll help you find an exact match to your brand.
 The interface will eventually support RGB codes, which you can insert values to match your exact branding guidelines. We look forward for your feedback.

Enhanced Document Reader

We've added to our already powerful document reader, by allowing you to now undo your annotations (in the remote case that you make a mistake). We have also added Print capability (if you have permissions granted for printing) the document with the annotations.

Enjoy secure collaboration on our platform.

Best regards,

AGORA SecureWare
