

Dear Customer,

At AGORA SecureWare, we're constantly trying our best to provide you with a leading application that responds to your specific needs. For this reason, we always highly value your feedback, so please keep the input coming on feature requests, etc.

In the last few days, we deployed an update to our platform, which includes several minor bug fixes and improvements.

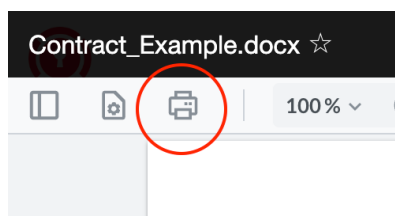

Search options

You can now directly add additional filters to your search query, just by clicking on the new “Search options” icon (🔍).

In addition, you have the possibility to either search throughout the whole Trust Room or only within the content of the current context (room, meeting, ...).

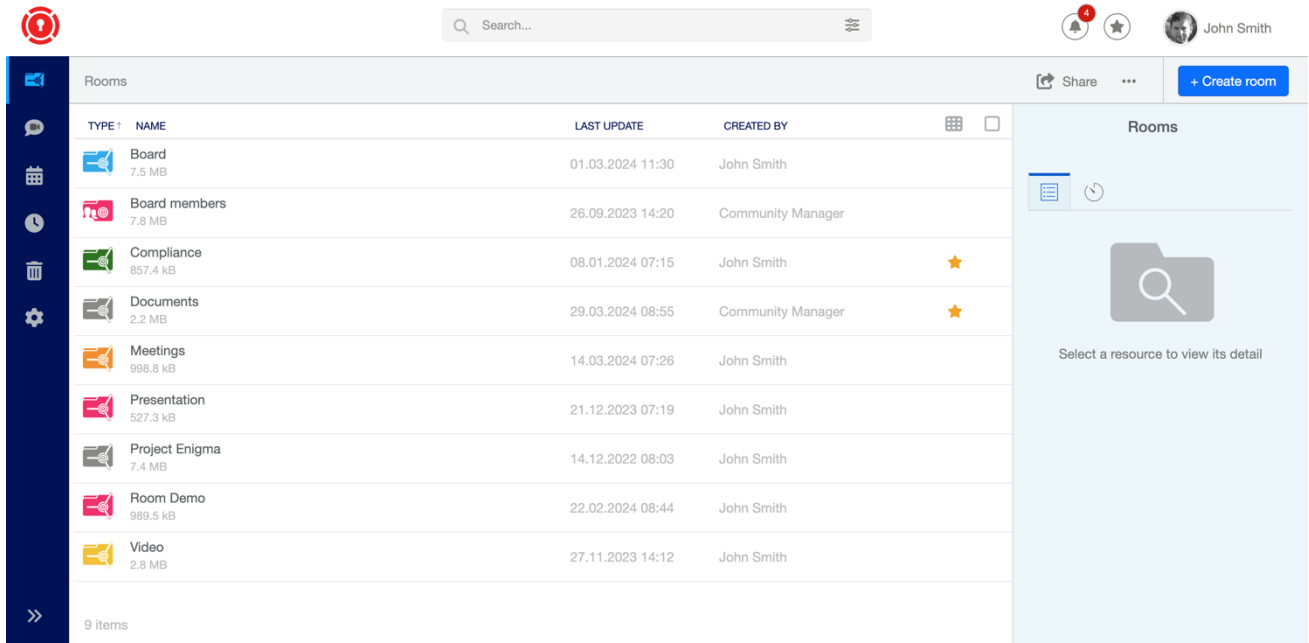

Print document

Print a document has never been simpler: just click the new print button on the document viewer toolbar.

New Indigo theme

We added a new “indigo” color theme. To set it, go to “Administration” and on the “Settings” page click on “Edit”. The new color scheme is in the “Theme and options” tab.

Please get in touch with us whenever you would like assistance or more information.

Enjoy secure collaboration on our platform.

Best regards,

AGORA SecureWare
