

Compliance Modules for Trust

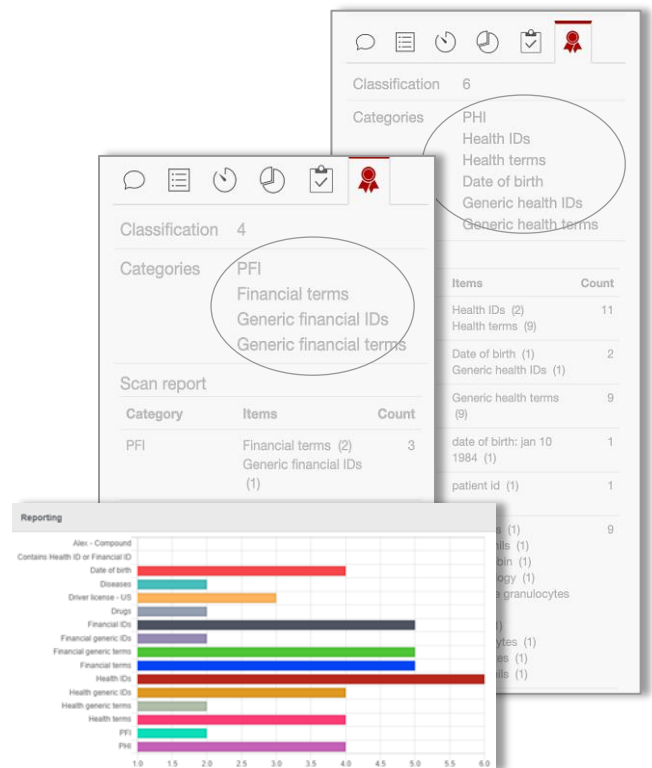

Automatically Classify Documents, Enact Policy and Ensure Compliance in the Cloud

The increasing scope of government regulation for protecting personally identifiable information and other sensitive content has made it imperative that your data remains secure and compliant. AGORA's Compliance Modules for Trust Rooms were designed to solve those needs, giving you ubiquitous control and visibility of your data compliance posture.

Drag and drop a file into a Trust Room running Compliance Modules and data will be automatically categorized, classified and subject to policies that best suit your business needs. Compliance Modules are fully scalable for any size organization and can be freely customized to meet your specific business and regulatory needs

Mitigate Compliance Risk:

- ❖ Finance:
 - Gramm-Leach-Bliley Act (GLBA)
 - Personal Financial Information (PFI)
 - General Finance: Banking, Financial Transaction, IBAN, Credit Cards
- ❖ Healthcare:
 - Health Insurance Portability and Accountability Act (HIPAA)
 - Provincial Health Insurance Plans (HIPAA)
 - Protected Health Information (PHI)
- ❖ Personally Identifiable Information (PII)
- ❖ General Data Protection Regulation (GDPR)
- ❖ General Data Protection Law – (Brazil LGPD)

Compliance Features at-a-glance

Multidimensional Scanning:

Drag-and-Drop Files/Folders. Compliance Modules scan for keywords, terms, patterns, masks and identifying phrases, ensuring documents are set to the correct classification.

Compliance Updates: Pre-set industry and vertically based compliance modules, automatically updated to keep in line with evolving regulatory standards.

Security: Content Policy Engine:

Encryption, Authentication, Watermarking, Access Controls on all content. Classification levels on documents determine handling. Share, store and collaborate with confidence. Audit-ready.

Mobile: Ensure compliance on the go. AGORA Compliance features work on any device, through the cloud or iOS/Android app.

Versatility: AGORA Compliance Modules scan and support all standard file types to a maximum of 4GB per file. Optical Character Recognition and nested attachments also supported.

Powerful Reporting: Demonstrate compliance efforts clearly and easily with powerful reporting on document access, file classification type and content type. Securely share compliance reports with auditors and trusted advisors.
